

EDUCATION

Sri Eshwar College of Engineering	B.TECH(AI&DS)	CGPA-8.34(upto 5 th sem)	2023-2027
Modern School	HSC	88.6%	2021-2023
Government Higher Secondary School	SSLC	83.00%	2020-2021

INTERNSHIP

AI Agents Internship — CodeBoosters Tech 2025

Completed an intensive internship focused on AI Agents and their applications, gaining practical knowledge in designing, implementing, and analyzing intelligent systems. Worked on hands-on tasks that enhanced problem-solving and AI development skills while improving teamwork, technical expertise, and project execution abilities through guided mentorship.

Full Stack Fusion: MERN Development Internship —Connect Training Solution 2025

Completed a 15-day industrial training and internship focused on MERN stack development, gaining practical knowledge in designing and building full-stack web applications. Worked on hands-on projects that enhanced skills in frontend (React.js), backend (Node.js, Express.js), and database management (MongoDB) while improving technical expertise, problem-solving abilities, and collaborative project execution through guided mentorship.

PROJECTS

News Summarizer and Translator 2025

A desktop application that fetches news articles from online sources and RSS feeds, summarizes the content, extracts keywords, and translates the text into multiple languages. Designed with a user-friendly interface, it enables fetching top, recent, cinema, and sports news, reading summaries aloud, and saving them as text files.

Tech stack: Python, Tkinter, newspaper3k, BeautifulSoup, gTTS,, Google Translate API, NLTK, Pygame.

AI for Smart Crop Disease Forecasting and Prevention 2024

A web application that detects plant diseases using AI and provides solutions and recommended products for prevention. . Designed to enhance crop management efficiency and reduce losses through early disease detection and actionable insights.

Tech stack: Python, Flask/Django (web framework), OpenCV, TensorFlow/,NLP, HTML/CSS/JavaScript, (MySQL/PostgreSQL).

Sign Language Detection for Home Automation 2024

A smart home automation system that recognizes sign language commands and performs corresponding actions, such as turning lights on or off. The system uses a trained AI model to predict user intent from sign language input, enabling hands-free control of home devices. Designed to assist people with hearing or speech impairments, the application improves accessibility and convenience.

Tech stack: Python, Machine Learning, Pandas, Scikit-learn, Custom Dataset (CSV), AI-based Intent Prediction.

CERTIFICATIONS

Certification in in pandas	Kaggle	2025
Certified in Learn Java Programming-beginner to master	Udemy	2024
Certified in Mastering Data Structure and Algorithms Using C and C++	Udemy	2024
Certification in DBMS	NPTEL	2023

ACHIEVEMENTS

Leetcode - Solved 220+ problems | Contest rating - 1410| Won badges - 4| [profile](#)

Hackerrank – 4 star coder in Java | 5 star in C++| [profile](#)

Code chef - Solved 440+ problems | [profile](#)

HACKSTROM 2K25- Project presentation winner - 36-Hours Hackathon 2025

pattern published - Accessible Voting Machine for Visually Impaired Users 2025

Embadathon - 1st runner up with case prize 2000 2025

SKILLS

Programming - Python | Java

Core Concepts - DSA | DBMS | OOP

Web Technologies - HTML | CSS | JavaScript | React | Node.js | Express.js

Database - MySQL | MongoDB

Data Science & Analysis Libraries - Pandas | NumPy | MatplotlibData Visualization - Matplotlib | Power BI

Tools - VSCode | Canva | Excel | PowerPoint | Jupyter Notebook | Power BI | GitHub | Git
